Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

Telegraphic Reports for Week Ended Jan. 15, 1921.

These reports are preliminary, and the figures are subject to change when later returns are received by the State health officers.

Wisconsin (December)	6	705	163	.....	326	.....	3	718	702	20

RECIPROCAL NOTIFICATION.

Connecticut—December, 1920.

Cases of communicable diseases referred during December, 1920, to other State health departments by department of health of the State of Connecticut.

Disease and locality of notification.	Referred to health authority of—	Why referred.
Diphtheria:		
East Haddam, Conn.	State Department of Health, Albany, N. Y.	Patient arrived in East Haddam, Conn., from New York City, within incubation period of disease.
Haddam, Conn.	State Department of Health, Trenton, N. J.	A small outbreak apparently was caused by a mild unrecognized case who arrived in Haddam, Conn., from Jersey City, N. J.
Norwalk, Conn.	State Department of Health, Albany, N. Y.	A day pupil of a White Plains, N. Y., school, became ill at his home in Norwalk, Conn.
Measles:		
New Britain, Conn.	do	Two patients, recent immigrants, apparently infected on board ship, landed at New York and arrived ill at New Britain, Conn.
Pneumonia:		
Greenwich, Conn.	do	Patient treated at Greenwich, Conn., hospital but was taken ill in Port Chester, N. Y.
Scarlet fever:		
Stonington, Conn.	State Department of Public Health, Boston, Mass.	Patient apparently infected on a visit in Boston.
Plainfield, Conn.	State Board of Health, Providence, R. I.	Patient apparently infected at a school in Providence, R. I.
Tuberculosis:		
Watertown, Conn.	State Board of Health, Baltimore, Md.	Patient ill with tuberculosis left Watertown, Conn., for Notcheliff, Md., for treatment.
Typhoid fever:		
Norwich, Conn.	State Department of Public Health, Boston, Mass.	Patient returned home to Norwich, Conn., from Dorchester, Mass., and became ill with typhoid the same day.

ANTHRAX.

California, Nebraska, New York, and Ohio.

During October, 1920, two cases of anthrax were reported in California; during December, 1920, one case was reported in Nebraska; and during the week ended January 1, 1921, one case was reported at New York, N. Y., and one death was reported at Springfield, Ohio.

BERIBERI.

California—November, 1920.

During November, 1920, one case of beriberi was reported in California.

CEREBROSPINAL MENINGITIS.

City Reports for Week Ended Jan. 1, 1921.

The column headed "Average cases" gives the average number of cases reported during the corresponding week of the years 1915 to 1919, inclusive. In instances in which the information is not available for the full five years, the average includes from one to four years.

LEPROSY.

California—October, 1920.

During October, 1920, a case of leprosy was reported at Santa Paula, Calif., in the person of B. S., white, male, aged 50, born in Mexico. The disease was diagnosed clinically October 18, 1920, as tubercular leprosy. The patient has lived in the United States for three years and is reported quarantined with guard under the supervision of the city health officer awaiting deportation.

Also during October a case of leprosy was reported at Alameda County Hospital, Alameda County, Calif., in the person of J. G., white, female, aged 74, born in Switzerland. The disease was diagnosed clinically on August 20, 1920, and verified the following day bacteriologically as anesthetic leprosy. The patient has lived at various places in the United States for 35 years and is now in the isolated leper ward of the Alameda County Hospital.

LETHARGIC ENCEPHALITIS.

California, District of Columbia, Florida, and Oregon.

One case of lethargic encephalitis was reported in California during October, and four cases were reported during November, 1920. During May four cases were reported in Washington, D. C., and during December one case was reported in Florida. During the week ended January 1, 1921, one case and one death were reported in San Francisco, Calif., and two cases and one death were reported in Portland, Oreg.
